GROUP OF COMPANIES USA

ENGINEERING·CONSTRUCTORS·OPERATORS

NORDMIN GROUP OF COMPANIES is a rapidly expanding Canadian company providing full EPC and EPCM solutions worldwide to the industrial sectors. Our work environment fosters innovation, creativity, and professional growth. Nordmin provides a dynamic and challenging work environment with a health benefits program and a 401K plan. In addition, we strongly believe in the principle of profit-sharing, offering an annual bonus to our employees whenever possible based on overall company performance.

NORDMIN ENGINEERING USA, INC., a division of Nordmin Group of Companies, is currently seeking a highly-skilled Civil/Structural Engineer to join our Salt Lake City team.

SENIOR CIVIL ENGINEER – STRUCTURAL/MINING

The Role:

This full-time position is responsible for analyzing and designing structural components of industrial facilities for the mining industry based upon site reviews in the field. The successful candidate will have a positive and enthusiastic attitude, be a team player and have a willingness to learn continuously. This interactive role must engage with various departments and clients.

Position Responsibilities:

- Develop effective designs, details, drawings, and specifications for industrial components of a mine site.
- Coordinate with various entities, including the project team, contractors, clients and other consultants to ensure work meets engineering standards, codes, specifications and design requirements per the client's specifications and needs.
- Maintain internal quality control for all drawings, design calculations and specifications for technical accuracy, conformance to project requirements, and overall constructability.
- Work with the PM team to ensure projects are completed on schedule and under budget.
- Maintain organized documentation of design files, drawings, and construction submittals.
- Provide construction assistance and respond to Requests for Information as necessary.

Education and Experience Requirements:

- BS degree in Civil Engineering from an accredited college/university is required. Master's degree a plus.
- 5+ years of relevant work experience is preferred. Mining experience is desired.
- Must possess a PE license in the state of Montana or have eligible NCEES profile to obtain licenses.
- AutoCAD experience required. Familiarity with 3D design software such as Revit, Inventor, Solidworks, S-Frame, and STAAD is a plus.

- MSHA certification desired.
- Experience with foundation drawings, rebar and support layouts, and structural steel is desired.
- Good mechanical aptitude as well as creativity in solving problems.
- Excellent written and verbal communication skills.
- Proficiency in MS Excel office and general computer navigational skills.
- Quality-oriented and safety conscious.
- Performance of general administrative duties and services as required.
- US Citizen or authorized to work in the United States.

Benefits:

- Health insurance
- Dental insurance
- Vision insurance
- Retirement plan
- Paid time off
